Articles

Jessica Sanchez & Joanna Burger, *Hunting and Exposure: Estimating Risk and Future Use at Nuclear Production Sites*

The authors advocate specific criteria for informed decisions about the future use of contaminated nuclear sites. They also compare the implications of official recommendations for one site with results from a study.

109

Christoph Rehman-Sutter, *Involving Others: Toward an Ethical Concept of Risk*

Dr. Rehman-Sutter argues for a juridical concept of risk as it relates to an ethic of care. He also contrasts his view with traditional economic risk analysis.

119

Lennart Sjöberg, *World Views, Political Attitudes and Risk Perception*

Dr. Sjöberg questions the Cultural Theory approach to evaluating variance in risk perception. He also presents the results of a survey using elements of that and other scales to help explain individual differences in risk perception.

137

Kris Wernstedt & Robert Hersh, *"Through a Lens Darkly" — Superfund Spectacles on Public Participation at Brownfield Sites*

The authors discuss the recent trend in brownfield site development against a backdrop of Superfund experience and explore current barriers to public participation.

153

Patricia Kocagil, Nadia Demarteau, Ann Fisher & James S. Shortle,
The Value of Preventing Cryptosporidium Contamination
 The authors evaluate the need for preventing illnesses and fatalities caused by
Cryptosporidium contamination of water supplies based on the impacts of recent and
 likely future outbreaks.
